	Application No.	Applicant(s)
Nation of Allowahilit.	10/717,400	REDDY ET AL.
Notice of Allowability	Examiner	Art Unit
	George Suchfield	3672
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. X This communication is responsive to 8/23/04 Communication.		
2. X The allowed claim(s) is/are <u>1-50</u> .		
3. The drawings filed on are accepted by the Examine	·,	
 4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a)		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/0: Paper No./Mail Date	6. ☐ Interview Summary Paper No./Mail Dat 8), 7. ☐ Examiner's Amendm	ė

Art Unit: 3672

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-50 is that none of the references cited, taken either singly or in combination, teach or disclose a method of forming a chemical casing in a wellbore while drilling through a zone or formation, and a chemical casing formed thereby, as set forth in the claimed combinations, including the representative step and/or limitation(s) in claim 1 wherein the drilling fluid utilized has "a pH in the range of from about 6 to about 10" and further includes a "delayed dispersible acid-catalyst" for curing both a "particulate curable solid thermoset resin" and a "water soluble or dispersible thermoset resin", also present in the drilling fluid. None of the cited prior art appears to teach or disclose such reaction mechanism and/or combinations of steps. For example, Morris (3,042,608) discloses a process of drilling and sealing across a penetrated formation or zone with a drilling fluid including a resin formulation which comprises a thermoset, C-stage resinoid, and thus does not include an acid catalyst, in the circulated drilling fluid and resin composition. Reddy et al (6,508,306), in one embodiment, injects into a penetrated zone a sealing composition comprising both a particulate and water soluble resin, an acid catalyst and polymer (col. 3, lines 13-18), but requires separate injection of a drilling fluid and does not disclose formation of a chemical casing. Similarly, the processes of Ortloff (3,126,959) or Novak (4,760,882) do not appear to include all the components set forth in claim 1 and/or include the reaction/resin components in a drilling fluid.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 703-308-2152. The examiner can normally be reached on M-F (6:30 - 3:00).

Art Unit: 3672

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on 703-308-2151. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
